WhatsApp Direct - Send Message Without Contact

This application is a great app for WhatsApp Messenger to send messages to any numbers those are not saved in your Contacts.

Features:
1) WhatsApp Direct
- You can send message and media directly in WhatsApp without saving contact

2) No need to save a Contact
- No need to save a number in Contact, directly add/select number and Send

3) Select number direclty from Call logs
- Just select number from recent call logs and send a message

4) Easy to send a message (How it works)
    1. Select a WhatsApp number
    2. Enter text message
    3. Tap "SEND" to send a message
    4. You can attach media from WhatsApp app's attach button.

Note:
- This app use an official whatsapp API to open a chat with any number you enter without create it as contact on your device.
- This app or app developer is not associated with WhatsApp. WhatsApp is a registered trademark of WhatsApp Inc.
- You should follow WhatsApp's terms & condition while sending messages through WhatsApp Direct App.

Library integrations:

1) **For Google Admob Banner ad,** Open strings.xml, Set your Google AdMob Keys (**banner_home_footer**)

```
<string name="banner_home_footer">REPLACE YOUR BANNER ID HERE
</string>
```

example:
```
<string name="banner_home_footer">ca-app-pub-
3940256099942544/6300978111</string>
```

2) Set **Crashlyics** into the project , get more info from https://fabric.io/kits/android/crashlytics/install. There is integrated **Crashlytics** already. You need to change it with your fabric account.

3) Set **Firebase** into the project, get more info from https://firebase.google.com/docs/android/setup. There is integrated firebase already. You need to change `google-services.json` file per your new package name.

That's it. Now you can run the app & Enjoy!
